SUMMARY

Full Stack engineer with 5+ years of professional experience across Django/DRF FastAPI, Node, Express and Golang, building and maintaining production REST APIs, relational database schemas, and backend services at scale. Built and deployed EMR systems serving 70+ production clients, with deep experience in database migrations, query optimization, and testing . Comfortable owning services end to end.Design, implementation, review, and production support.

SKILLS

Languages: Python, JavaScript/TypeScript, Go

Backend Frameworks: Django, Django REST Framework, FastAPI, Node.js/Express, Hasura GraphQL

Databases: PostgreSQL, MySQL, SQLite, MariaDB, MongoDB, Neo4j — schema design, migrations, query optimization, indexing, partitioning

Testing: Pytest , Django Unit test,,structured schema validation (Pydantic)

Async & Background Processing: Celery, Redis, async Python, BullMQ

Cloud & Infrastructure: AWS (EC2, S3, Lambda, RDS, CloudFront, IAM), Docker, Nginx, Kong, GitHub Actions, GitLab CI

Other: RESTful API design, ETL pipelines, system architecture, code review, , Agile/Scrum

EXPERIENCE

Full Stack Developer — Braincode sp z o.o. ([viralcut.io](#))

01/2026 – Present

Remote — Warsaw, Poland

- Lead backend development of InfluencerMkt (influencermkt.com), a SaaS marketplace, building two parallel implementations: FastAPI/SQLAlchemy/Pydantic and Next.js/PayloadCMS, both on a shared PostgreSQL database.
- Designed backend schemas and REST API integration patterns for buyer and seller account relationships and AI-generated media assets.
- Built backend workflows for AI avatar, video, and image generation (viralcut.io) with structured schema validation and API orchestration. Stack: Django.

Full Stack Developer — Orbit Health PLC

09/2023 – 09/2026

Addis Ababa, Ethiopia

- Designed and led the backend architecture for Orbit EMR (Node.js/Express exposing GraphQL, PostgreSQL), a platform deployed across 70+ health facilities, including the Ethiopian Red Cross Society.
- Designed and built a multi-site data synchronization system spanning 7 production databases, replicated in near real time across 3 remote sites with no public IPs.
- Migrated the sync layer from SymmetricDS to a custom Airbyte-based architecture; built a Python ETL pipeline using Kahn's algorithm for FK-aware insert ordering, with SSH-tunneled replication.
- Owned PostgreSQL schema design, indexing, and partitioning across the platform, improving query performance under production load.
- Integrated Orbit EMR with laboratory, SMS, billing, and pharmacy systems via REST/GraphQL APIs.
- Reviewed code and mentored contributing developers on backend design and code quality.

Software Engineer — Dan Energy Ethiopia

09/2022 – 09/2023

Addis Ababa, Ethiopia

- Maintained and enhanced web applications and databases using Python, Django, Django REST Framework, Celery, and PostgreSQL.
- Implemented a comprehensive testing strategy using Pytest for backend and integration tests, achieving 85%+ code coverage.

Enterprise Solutions Engineer — Walia Technologies PLC

09/2021 – 09/2022

Addis Ababa, Ethiopia

- Installed and configured Active Directory roles, and managed user profiles and accounts.
- Configured and tested Linux and Windows Server OS features and roles; documented system configurations for maintainability.

PERSONAL PROJECTS

- MedalAI — AI video & avatar generation platform: architected end to end, including a credit ledger pattern with atomic operations and idempotency keys, and a model router built on Jev (TypeSafe AI) across Gemini, Claude, and OpenAI. Stack: FastAPI, Redis, PostgreSQL, Nuxt 3.
- Database Explorer (2023): Single-interface introspection, visualization, and schema/data management tool across SQL and PostgreSQL databases. Stack: FastAPI, SQLAlchemy, PostgreSQL, SQLite, MySQL, MariaDB, Nuxt.js.

COMMUNITY INVOLVEMENT

- Founded and manages Addis Tech Jobs, a free community initiative aggregating IT job opportunities from LinkedIn, Telegram, and other platforms; grown to 4,000+ developers and followers over 3+ years.
- Publishes technical tutorials and articles on Medium covering Python, Django, and AWS, focused on backend development and cloud architecture.

EDUCATION

Computer Engineering — Bahir Dar Institute of Technology, Bahir Dar, Ethiopia

09/2022
